Skills

Artificial intelligence
Algorithm implementation in Python, use specific library (scikit-learn, tensorflow, keras)

Python
OOP, Data modeling (regression, classification, PCA, ...), Data prepration and visualization, Web App (Streamlit)

Data visualization
Create powerful dashboard with Loker Studio, Tableau, PowerBI, plotly

Big Data
Hadoop, Spark, Hive, HDFS, MapReduce

SQL
create complex query using DBT's model

Git
Version control, pull request, merge

Languages

French
Mother tongue

English
B2

Experiences

Project in data and artificial intelligence
2022 Hetic Montreuil

- Create a web application in python that lists and analyzes the TDoR data (dashboard)
- Topic Modeling on proposals and projects of Laws in France from 2017 to date
- Creation of a web application regrouping diagnostic tests used in mental health
- Useful tools : Date calculator, QR generator, Strong password generator

And more on my website

Data analyst
From May 2022 to October 2022
Click And Boat Boulogne Billancourt

Putting data at the heart of marketing strategies and decision making

- Build segmented users segments and import them into CRM tool and Push CRM data in datalake with SQL.
- Create dashboards on Tableau for the Marketing BU having established the needs in collaboration with the stakeholderss.
- Audiences behavior analysis (e.g. new customers VS regular customers, differences in consumption between markets and periods, cross device behaviors, ...)

Education

Master Data & AI
Since November 2022 HETIC Montreuil

- Dashboard creation (PowerBi, Tableau, Looker Studio)
- Python programming for Data Science
- SQL and NO-SQL database management
- Artificial Intelligence (neural networks, NLP, ..)

Master Structural And Functional Biochemistry
From 2018 to 2020 Toulouse University Toulouse, France
Select the analyses needed to answer a biological question.
