Camille LEBRUN

Data scientist

After a master's degree in structural biochemistry I decided to focus on Data and artificial intelligence. In order to deepen my skills in Data Science. I believe that Data and AI must be on the side of the Human, ethical at the heart of our practice.

Work experience

Data analyst
From May 2022 to October 2022
Click And Boat Boulogne Billancourt

- Build segmented users segments and import them into CRM tool and Push CRM data in datalake.
- Create dashboards on Tableau or the Marketing BU having established the needs in collaboration with the stakeholderss.
- Audiences behavior analysis (e.g. new customers VS regular customers, differences in consumption between markets and periods, cross device behaviors, ...)

Skills

AI
Algorithm implementation in Python, use specific library (scikit-learn, tensorflow, keras)

Python
OOP, Data modeling (regression, classification, PCA, ...), Data prepration and visualization, Web App (Streamlit)

Data visualization
Create powerful dashboard with Loker Studio, Tableau, PowerBI, plotly

Big Data
Hadoop, Spark, Hive, HDFS, MapReduce

SQL
create complex query using DBT's model

Git
Version control, pull request, merge

Education

Master Structural And Functional Biochemistry
From 2018 to 2020 Toulouse University Toulouse, France
Select the analyses needed to answer a biological question.

Master Data & AI
Since November 2022 HETIC Montreuil

- Dashboard creation (PowerBi, Tableau, Looker Studio)
- Python programming for Data Science
- SQL and NO-SQL database management
- Artificial Intelligence (neural networks, NLP, ..)
